

REPORT ON SEXUALITY TRAINING FOR CHILDREN WITH SPECIAL NEEDS

D.ed ASD students and teacher Tanya ma'am attended workshop on 1st October 2017 at Centre for hope, Ghaziabad

It was monitored and headed by Dr. Gaurav Chadha who is an occupational therapist at Centre for hope and organized by Association of Rehabilitation Parents & Professionals (ARPP). The head of ARPP told us about the work of their organization. Listening to them was very inspiring as their achievements are very huge in the field of rehabilitation.

It was an educational programme based on SEXUALITY training for Children with special needs. Students got to learn how to train children with special needs the topics like:

- Toilet training
- Good Touch Bad Touch
- Masturbations Issues
- Menstrual Care
- Escape From Sexual Abuse
- Is Marriage Is Necessary

It was very beneficial and knowledgeable for all the students. And also some of our students were the part of hands on training where children acted on a particular topic in groups .

Overall, attending the workshop organized by ARPP will bring about a fruitful result in the upcoming future. We are hoping to get more such chances to attend such kind of workshops conferences and seminars in the near future under such a helpful and oriented guidance.

Regards

D.ED ASD

Glimpse of the Workshop
