## International Conference on “Cochlear Implant Instructional Course”

Cochlear implant (CI) is the most advance techniques available for children with profound hearing impairment. Cochlear implants offer more benefits to some recipients than to others. It is difficult to predict how well any individual's brain will be able to interpret the new auditory signals it is receiving with the implant.

This conference aims to be the premier scientific meeting and will help us take a step forward in the field of cochlear Implant. The vast experience of our eminent international and national faculty will allow us to update with the available cutting-edge skills.

This meet will provide a platform for all to learn and share the passion for empowering hearing impaired population.

### Objectives of the conference:

- To encourage scientific study of the processes involved in Cochlear Implant
- Foster improvement of therapeutic procedures
- To stimulate exchange of information among professionals thus engaged and disseminate such information,
- To facilitate research in the field of Cochlear Implant and guiding such research.

### Themes:

- The cochlear implant - How it works? Pre- implant audiology & speech, Guide to case selection.
- How radiology influences decision making. Potential red flags, surgical aspects in CI and challenges
- Checking device function ,switch on & generation of MAP (intra and post op test)
- Parameters of mapping & troubleshooting of device
- Academic struggles , educational modification
- Rehabilitation and follow up
- Govt. schemes (facilities / concessions), funding of CI program and Disability certificate
- Quality of life and challenges of CI recipients (U/L / B/L CI , bimodal hearing & ANSD)
