Dear staff & Students

As you may be aware of the Novel Coronavirus reported from China and 24 other countries. Though much is not known about the disease dynamics, it is evident that there is human to human transmission. As of now, there is no drug or vaccine available to manage this disease. Hence preventive measures become crucial to stop spread of this disease.

Some of the preventive interventions are must for everyone such as

1. frequent hand wash, respiratory etiquettes (using handkerchief over mouth while coughing/sneezing
2. use of tissue paper or using the sleeve of shirt covering upper arm
3. staying away from college when sick, avoiding public gathering etc) will help in preventing/reducing transmission of not only this disease, but also large number of other communicable diseases, notably flu like illness.

As a preventive measure all the students are notified to wear mask and use hand sanitizer in the college premises.

Ms Sanjana Mittal
Deputy Director

Dr Anmol Arora
Medical Director
