

Appendix-12

Name & Address of the Institution: - **Ashtavakra Institute of Rehabilitation Sciences and Research, 5PSP Institutional Area, Madhuban Chowk, Sector 14 Rohini, Delhi -110085**

New Teaching Techniques:

methods and techniques that teachers will select and deploy to support their pupils or students through the learning process. A teacher will choose the teaching strategy most suitable for the topic being studied, the level of expertise of the learner, and the stage in their learning journey.

Artificial Intelligence

Artificial intelligence is a branch of computer science that aims to create intelligent machines. It has become an essential part of the technology industry. Research associated with artificial intelligence is highly technical and specialized. The core problems of artificial intelligence include programming computers for certain traits such as:

- Knowledge
- Reasoning
- Problem solving
- Learning
- Planning
- Ability to manipulate and move objects

Internet of Things

The Internet of Things is a name for the aggregate collection of network-enabled devices, excluding traditional computers like laptops and servers. Types of network connections can include Wi-Fi connections, Bluetooth connections, and near-field communication (NFC). It includes devices such as "smart" appliances, like refrigerators and thermostats; home security systems; computer peripherals, like webcams and printers; wearable technology, such as Apple Watches and Fit bits; routers; and smart speaker devices, like Amazon Echo and Google Home.

Virtual Reality

VR is a self-controlled environment where the user can control the simulated environment via a system. VR enhances a fictional environment by using sensors, displays, and other features like motion tracking, Movement tracking, etc.

| | |
|----------------------------------|--|
| Augmented Reality | Reasoning Augmented reality (AR) is the real-time use of information in the form of text, graphics, audio and other virtual enhancements integrated with real-world objects. It is this "real world" element that differentiates AR from virtual reality. AR integrates and adds value to the user's interaction with the real world, versus a simulation. |

HUMAN LEARNING : **meaning , definition and concept** **formation**

Learning

Learning without reflection is
a waste. Reflection without
learning is dangerous.

Quote by Confucius
