The World Hearing Day Celebration was organized to raise awareness about hearing loss and promote ear and hearing care across the globe. This annual event serves as a platform to advocate for early detection and intervention for hearing loss, as well as to educate communities about the importance of preserving hearing health.

The theme of the 2023 World Hearing Day was "Ear and Hearing Care for All". This year AIRSR conducted various activities to promote the awareness about how we should take care of our Ear and the importance of

Report: Description in (min 250 to max 800 words)*

Hearing . Ms. Sanjana Mittal Deputy Director of AIRSR initiated the program with her speech highlighting the importance of hearing in our life. All the students of HI department participated in the various activities like 'poster making', Presentation, 'Nukkad Natak'. The students uploaded the poster on their social networking websites to create awareness about hearing. A nukkad natak was performed by the students to create awareness about the importance of hearing and ear.

The purpose to celebrate this event was to enhance the students' understanding of hearing and providing them the deeper knowledge that if we did not care our ear then how it will create problems and affect our lives.

Key points of awareness created by Students

- Good hearing and communication are important at all stages of life.
- Hearing loss (and related ear diseases) can be avoided through preventative actions such as: protection against loud sounds; good ear care practices and immunization.
- Hearing loss (and related ear diseases) can be addressed when it is identified in a timely manner and appropriate care sought.
- People at risk of hearing loss should check their hearing regularly.

Attendance Sheet*	Attached at the end of Report
Feedback	The majority of participants indicated that they gained a better understanding of hearing loss and its impact on individuals and communities as a result of the event. The awareness campaigns, educational workshops, and free hearing screenings were particularly effective in disseminating key information about hearing health.
