**Event:** Awareness on World Wetland Day

**Date:** 2<sup>nd</sup> February 2023 (Thursday)

**Time:** 01:30 PM to 2:30 PM

**Venue:** 101 Conference Hall

**Convener:** Sandeep Tiwari (Eco- Club In charge)

**Beneficiaries:**

**Objective:-**

- To create awareness on World Wetland Day.
- To create the awareness regarding continuous efforts to save the Wetland.
- To appraise the various practices and measures to improve the Wetland.
- To create the awareness regarding impact of wetland on environment.

## Report

An Awareness program on wetland was organized by **Ashtavakra Institute of Rehabilitation Sciences** on **2<sup>nd</sup> February 2023, Thursday**. The program start by introductory speech on wetland by **Mr. Sandeep Tiwari** in which he expressed his views that Wetlands are ecosystems where water is the primary factor controlling the environment and the associated plant and animal life, in the wetlands includes both freshwater, marine and coastal ecosystems such as all lakes and rivers, underground aquifers, swamps ect. These lands are critical to people and nature, given the intrinsic value of these ecosystems, and their benefits and services, including their environmental, climate, ecological, social, economic, scientific, educational, cultural, recreational and aesthetic contributions to sustainable development and human wellbeing.

There after **B.Ed. ASD student Kriti, Nikita, Manika, Asha and Manvi Mittal** present their views on wetland through power point Presentation: **Kriti and Nikita** share her views that How do wetlands combat climate change, Wetlands are a natural solution to the era-defining global threat of climate change. They absorb carbon dioxide so help slow global heating and reduce pollution, hence have often been referred to as the **"Kidneys of the Earth"**.

**Manika B.Ed. ASD** students talk about the theme of this year that **"It's Time for Wetlands Restoration,"** It highlights the urgent need to prioritize wetland restoration.

There after **Asha Bairwa** give her views that **why they are in danger**-Wetlands are among the ecosystems with the highest rates of decline, loss and degradation. Indicators of current negative trends in global biodiversity and ecosystem functions are projected to continue in response to direct and indirect drivers such as rapid human population growth, unsustainable production and consumption and associated technological development, as well as the adverse impacts of climate change.

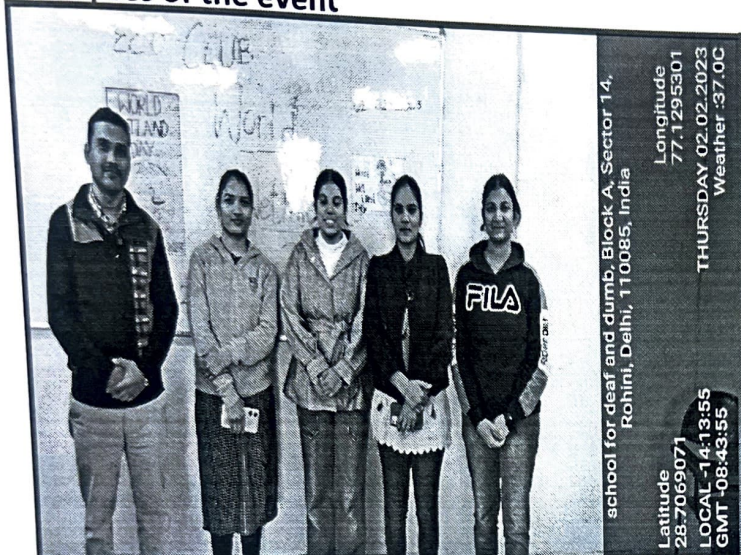

Wetlands are disappearing three times faster than forests and are Earth's most threatened ecosystem. In just 50 years — since 1970 — 35% of the world's wetlands have been lost. Human activities that lead to loss of wetlands include drainage and infilling for agriculture and construction, pollution, overfishing and overexploitation of resources, invasive species and climate change.

The concluding speech delivered by **Manvi Mittal B.Ed. ASD** student in which she discussed that International days and weeks are occasions to educate the public on issues of concern, to mobilize political will and resources to address global problems, and to celebrate and reinforce achievements of humanity. After this she says thanks to everyone present in conference room.

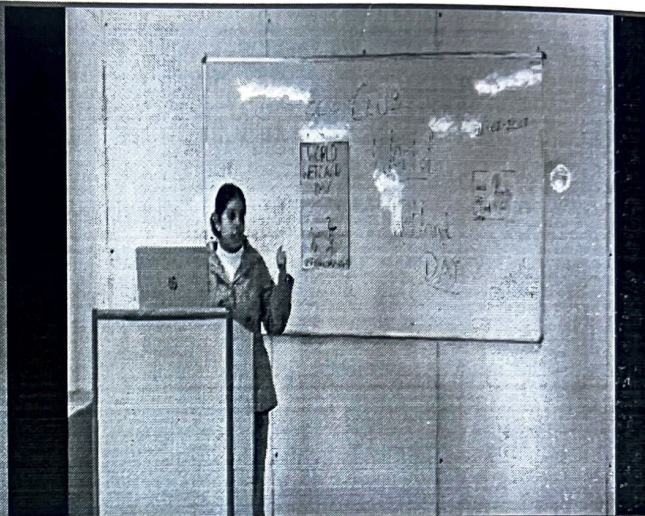

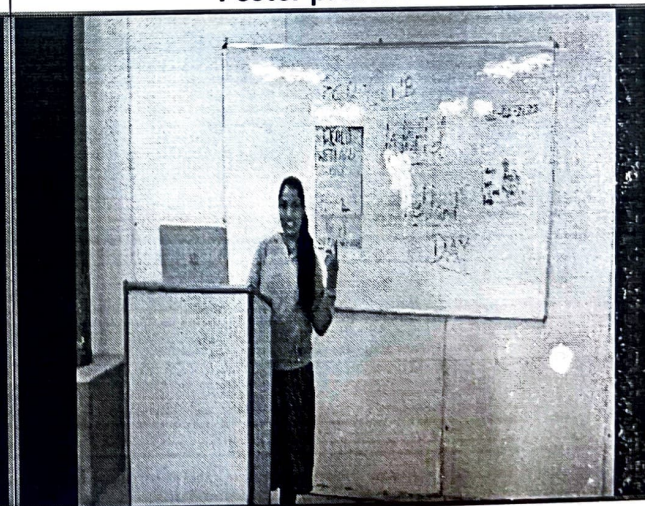

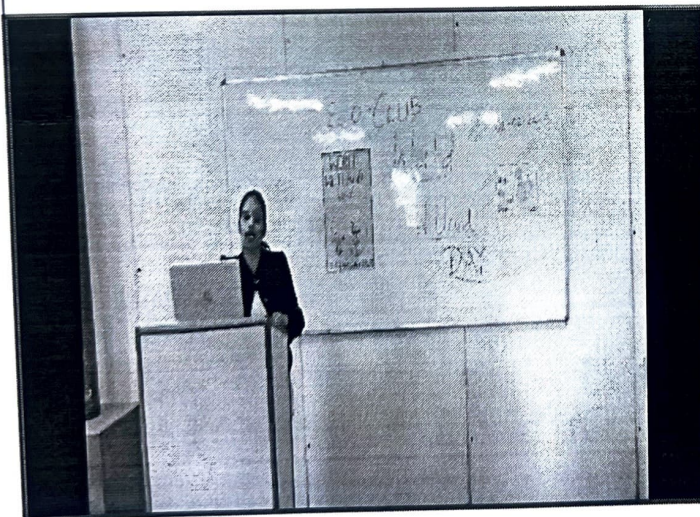

## Glimpses of the event

**Mr. Sandeep Tiwari In charge Eco Club, AIRSR, and students.**

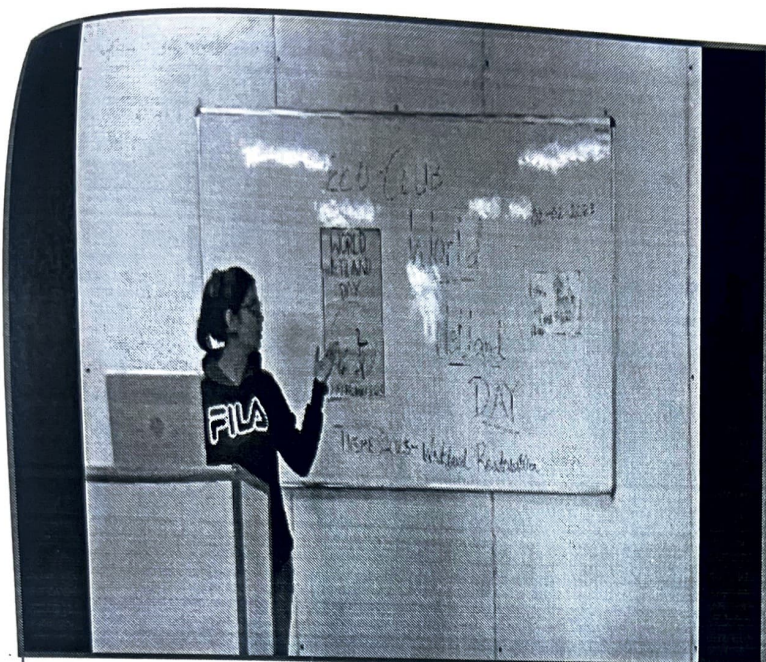

**Kriti Dhunna student of B.ED. ASD 1Year Expressing her view on Wetland Day through Poster presentation.**

**Nikita and Asha Bairwa student of B.ED. ASD 1 year creating awareness on Wetland Day through Poster presentation.**

**Manika student of B.ED. creating awareness on Wetland Day through Poster presentation.**

**Manvi Mittal the students B.Ed. ASD 1 year Giving Concluding speech on wetland day event.**

### **Learning Outcome**

- The Students learnt about Wetland
- The Students learnt about need of Wetland.
- The students learnt about Ecosystem.
- The Students appreciated the practices and measures to improve the Wetland.
- The Students learnt about importance of healthy and clean environment.
