## Report An Awareness program on international Day of Biological Diversity was organized by

Ashtavakra Institute of Rehabilitation Sciences on 22<sup>nd</sup> May 2023, Monday. The program start by introductory speech on Biodiversity by Mr. Sandeep Tiwari in which he expressed his views that Biodiversity is important to most aspects of our lives, it levels, from genes to ecosystems, and can encompass the evolutionary, ecological, and cultural processes that sustain life. We value biodiversity for many reasons, some utilitarian, some intrinsic. This means we value biodiversity both for what it provides to humans, and for the value it has in its own right. Utilitarian values include the many basic needs humans obtain from biodiversity such as food, fuel, shelter, and medicine Biodiversity has cultural value to humans as well, for spiritual or religious reasons for instance. The intrinsic value of biodiversity refers to its inherent worth, which is independent of its value to anyone or anything else.

There after B.Ed. ASD student Kirat Kaur Mathau, and kriti present their views on Biological Diversity through presentation: they expressed that six reason why we need biodiversity

1- Climate change and biodiversity are inextricably linked 2- Food security 3- Clean air and water 4- Natural resources and feedstock 5- Preventing diseases and pests 6- Quality of life

Manika B.Ed. ASD students talk about A healthy biodiversity provides a number of natural services for everyone: Ecosystem services, such as- Protection of water resources, Soils formation and protection, Nutrient storage and recycling, Contribution to climate stability, Maintenance of ecosystems, Recovery from unpredictable events.

Biological resources, such as-Food, Medicinal resources and pharmaceutical drugs, Wood product, Ornamental plants, Breeding stocks, population reservoirs, Future resources, Diversity in genes, species and ecosystems, Social benefits, such as-Research, education and monitoring, Recreation and tourism Cultural values

Some other B.ed. Student discussed that the climate has always changed with ecosystems and species coming and going, *rapid* climate change affects ecosystems and species ability to adapt and so biodiversity loss increases. From a human perspective, the rapid climate change and accelerating biodiversity loss risks human security.
