Introduction of CBR

Community Based Rehabilitation (CBR) is a community development strategy that aims at enhancing the lives of persons with disabilities (PWDs) within their community. Community-based rehabilitation (CBR) was initiated by WHO following the Declaration of Alma-Ata in 1978 in an effort to enhance the quality of life for people with disabilities and their families; meet their basic needs; and ensure their inclusion and participation. While initially a strategy to increase access to rehabilitation services in resource-constrained settings, CBR is now a multi-sectoral approach working to improve the equalization of opportunities and social inclusion of people with disabilities while combating the perpetual cycle of poverty and disability. CBR is implemented through the combined efforts of people with disabilities, their families and communities, and relevant government and non-government health, education, vocational, social and other services (WHO).

The screenshot shows a Beamer presentation slide with a blue background and a yellow and white wave graphic at the bottom. The main text on the slide reads: **"What is the concept of CBR and steps of CBR"**. Below this, it says "Presented by Mr Prabhat Ranjan Assistant professor". The Beamer interface is visible, including a menu bar with options like Home, Insert, Design, etc., and a slide navigation pane on the left.
