EVENT NAME: - NSS DAY CELEBRATION

Title of Activity*

NUKKAD NATAK [ANTI -DRUG -CAMPAIGN] FOOD DISTRIBUTION]

Values

Anti-drug campaigns hold significant value for society, aiming to reduce drug abuse, protect youth, boost public safety, and promote healthy communities. Their effectiveness depends on comprehensive strategies, public engagement, and strong enforcement, though some campaigns have shown mixed results regarding actual behavioral outcomes.

Learning Outcomes

Learning outcomes for anti-drug campaigns commonly include increased awareness of drug dangers, development of decision-making skills, and the motivation to adopt healthy, drug-free lifestyles. Campaigns in educational settings often aim for students to understand the negative effects of drugs, resist peer pressure, build resilience, and take active roles in prevention efforts.

Report: Description in (min 250 to max 800 words)*

An anti-drug campaign is a coordinated effort, often led by government and non-government organizations, designed to prevent drug abuse, particularly among youth, through awareness, education, and community involvement. These campaigns aim to reduce the demand for illicit drugs by informing the public about the harmful social and health consequences of drug use. They use various media such as TV, radio, social media, and print materials to reach targeted groups like young people and their parents. The campaigns also include initiatives to support treatment and rehabilitation for drug users and enforcement efforts to disrupt drug supply and trafficking. For example, the National Youth Anti-Drug Media Campaign in the U.S. focuses on influencing public attitudes and reducing youth drug abuse through messaging about resisting drugs, positive alternatives, and the negative consequences of drug use. Similarly, India's Nasha Mukta Bharat Abhiyaan works with a three-pronged approach combining supply reduction, outreach, awareness, and demand reduction through treatment and rehabilitation.
